DC-10

Upgrading your M2 with the DC-10, a perfect addition for limited frames that adds over 20 cu ft of extra space. The DC-10 is an ideal solution for tractor or vocational body configurations that have limited frame space. The DC-10 model features our unique ground access door through the back wall for easy loading and unloading. Say goodbye to climbing in the cab with your hands full and keep your slip accidents to a minimum. Stand out on the road with the DC-10's full-length stainless side fairing package, designed to provide space for backlighting. Attract more drivers to your fleet and leave the competition in the dust with the DC-10.

DC-16

Upgrade your cab space with the versatile DC-16. This model is perfect for vocational customers in need of more room and dry storage, the DC-16 features side door access for easy and convenient storage. The 18" tall doors are ideal for storing larger items like safety gear and equipment. With various cabinet options available, you can customize the DC-16 to fit your specific needs. The through cabinet option is perfect for stowing long items such as spray wands. Plus, the DC-16 enhances safety by eliminating the need for constant climbing in and out of the cab, reducing costly slip hazard injuries. Upgrade your trucks with the DC-16 for a more efficient and organized workspace.

DC-22

Space is always at a premium for vocational trucks, and the DC-22 is the ideal solution for efficiently organizing gear while ensuring quick access. Weighing only 160 lbs, this versatile and customizable model surpasses traditional extended cabs in storage capability. We provide various cabinet sizes and configurations, allowing you to order the DC-22 as a box only for a fully tailored space to meet your specific needs.

Additionally, the DC-22 features a through-bench option, similar to the DC-16. This bench offers ample width, providing a comfortable resting area for hardworking crews during disaster support or in remote work locations.

DC-27

The DC-27 Sleeper offers the convenience of fitting a spacious 24" legal width mattress for added comfort. Additionally, drivers can easily access the side compartments both inside and outside the sleeper, as well as conveniently store items under the open center section. The interior of the DC-27 is designed to be fully customizable according to your preferences, allowing you to personalize it to suit your individual needs and preferences.
